Cheetah train; Storm of excitement

Cheetah train is VR equipment designed and produced with the aim of simulating the movements of various roller coasters. Two users enjoy an exciting journey by sitting in the cabin, installing virtual reality goggles on their eyes and fastening the guards. One of the special features of Cheetah train is the possibility of a 720° rotation which conveys the best sense of an actual roller coaster to users.

Combination of virtual reality technology & mechanical movements of Cheetah train brings the users into an atmosphere full of excitement and surprise. Users discover world of fun with Cheetah train and enjoy our incredible VR simulator. safe design, along with ergonomic principles, makes this immersive experience perfect.

Game features
