Mini fun

Mini Fun is the smallest and most affordable virtual reality motion simulator for use at home, game clubs, indoor and outdoor amusement parks.

Mini Fun has a high dynamic range and can simulate experiences such as driving, flying, roller coaster, etc.

The user sits in a hemispherical cabin and moves freely in the direction of the virtual reality movie. The excitement experienced by the Mini Fun passenger is equal to the actual experience of competition and accuracy.

The advantages of Mini Fun include very low depreciation, easy use at home and small environments, light weight, easy transportation and compatibility with all types of available headsets.

360-degree rotation and bending angle in vertical and horizontal axis more than 35 freedom degrees are special capabilities of this device.
